

**LOADING, MARKING,
CHAMFERING, COILING and
FLATTENING, TAGWELDING
UNIT**

The unit combines critical production processes in one integrated system. The unit carries out loading, marking, chamfering, coiler and flattening and tag welding.

Features

•**Loading Capacity:** *The unit loads sheet metals in various sizes and weights according to customer demands.*

•**Marking:** *Ensures tracibility.*

•**Chamfering:** *Avoiding sharp edges to obtain a better quality product.*

•**Coiler and Flattening:** *Flat sheet metals are bended and ensures a flat top surface for butt welding operation.*

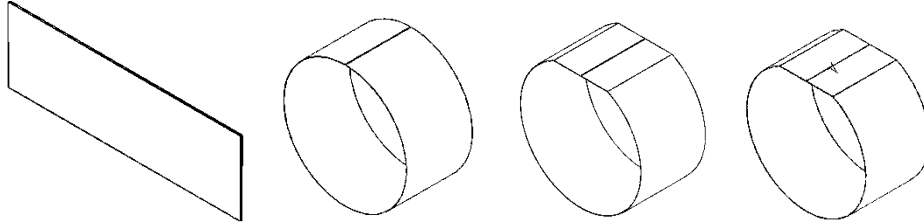

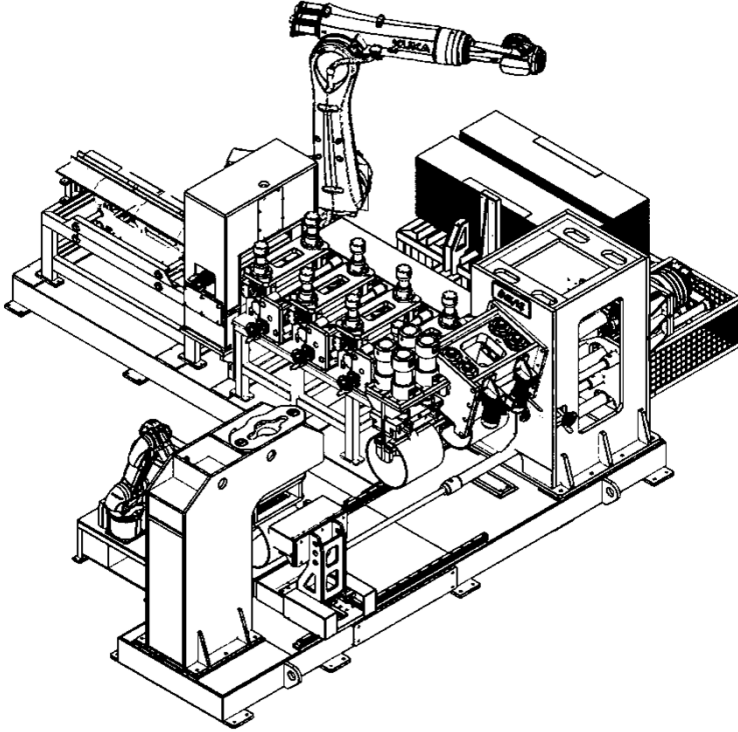

•**Tag Welding:** *The unit points by welding the flat top surface just before the tag welding operation. The operation ensures the correct placement for further operations.*

Benefits

•**Save space by avoiding multiple units need and reduce the cost. Accelerate the production process times, reduces labor and improves product quality.**

•**High flexibility and multifunctional, it appeals to a wide range of customers.**

• **High return on investment by increasing production line efficiency and minimizing downtime.**
